## **VAX VacationAccess Provides New Options to Manage Agent Reservation Data**

**MILWAUKEE, Wis. (July 15, 2010)** — In addition to the powerful tools VAX VacationAccess offers to help agents be more productive, VAX continues to enhance the leisure travel platform to help agency owners and managers better manage their business. This enhancement, Secure Agent Access, allows agency owners and managers to control the reservation information their agents can view on VAX. It also reduces search time and protects data for agents.

VAX Secure Agent Access provides agency managers more control over the reservation information their agents see when booking on VAX. Secure Agent Access provides agency owners and managers the flexibility to set access on an individual agent basis. Agency owners have the flexibility to limit access to only each agent's individual reservations while giving managers access to all reservations. In addition to protecting the privacy of individual agent reservations, agents will save time by searching only their reservations when retrieving them on VAX.

“VAX is committed to providing agencies the tools they need to effectively manage their business. We know that every agency has unique needs and Secure Agent Access gives them the flexibility to set up their agency user access the way that works best for their business,” said Kathy Fitzpatrick, president of VAX VacationAccess.

Secure Agent Access is the latest of new enhancements and tools VAX delivers to help travel agents and agencies be more productive and profitable. Watch for more enhancements and new tools as VAX continues investing in the future success of travel agents.
